DESCRIPTORS: *Polyvinyl chloride, *Plasticizers,
Molecular structure, Polymers, Binders, Electrical
properties.

The molecule of a plasticizer contains polar and non-polar groups. The amount ratio of polar to non-polar groups is decisive for the compatibility of the plasticizer in PVC. The polar groups serve as binders. Non-polar molecule components can be divided into polarisable (aromatic) and non-polarisable (aliphatic), whereby two opposite types of plasticizer can be dis-
